TO THE FRIENDS OF FREE SCHOOLS.

(Boston)

The Committee of One Hundred Citizens, the mission of which is to serve the nation by carefully guarding the interests of its Public School System, is now ready to receive contributions from its constituency and friends. The Committee is thoroughiy organized. It has divided itself into sub-committees, and has carefully detailed its work for the coming fall. The Citizen's Committee of One Hundred labors to keep our schools non-sectarian, to point out their foes, and to indicate methods for promoting the efficiency of our schools. For the accomplishment of these aims, public meetings must be held for platform discussion, and instructive literature must be published and freely distributed. This requires money. The Committee asks all to allow their loyalty to America's Public School System to materialize. A small contribution from all will make a princely sum. All monies will be loyally and honestly expended. Not a dime will be wasted. Our Public Schools are the great unifiers of the different human elements which are being poured into our Republic; and because of this, we must stand by them. "United we stand, divided we fall."

Contributions may be sent to the Treasurer, P. O. Box 1345, or left at the Office of the Committee, Room 22, Congregational House.

Boston, Mass., October, 1888.
